September 10<sup>th</sup>, 2023

Dear Hiring Manager,

I am writing to express my strong interest in the Associate position at Strategy&. Currently serving as a Senior Consultant at EY in the Financial Services Office (FSO), I have led numerous strategic data-related projects for some of the world's leading international banks.

My time at EY has been particularly enlightening in cementing my passion for strategy consulting. I have actively participated in high-level strategic discussions and client meetings, experiences that have confirmed my strong interest in transitioning to a role at Strategy&. Here, I aim to continue to solve complex challenges and drive business transformation.

Over the past year at EY, I have been immersed in various strategic projects, which have involved advanced data analysis and solution development. In addition to technical proficiency in Python, SQL, R, and Spark, I have honed my skills in applying machine learning algorithms to a variety of data types. My responsibilities have gone beyond technical analytics, as I have often been involved in client-facing situations requiring deep analytical insight and superior communication skills.

Prior to my role at EY, I was a Data Scientist at BNP Paribas Personal Finance, where I developed neural network algorithms integrated with Natural Language Processing (NLP) to establish new KPIs in the fields of marketing and customer analytics. My contributions were significant enough to warrant direct involvement in client meetings and discussions with senior management.

Additionally, my six-month tenure as a risk analyst and data scientist for an MGA and Lloyd's Coverholder in Dubai has provided me with a unique perspective on data analysis across sectors. From analyzing spacecraft components to developing aviation risk databases, I have a broad range of experiences that inform my approach to strategy.

My academic background in data science and statistics from the Toulouse School of Economics, along with my competitive accomplishments such as the MunichRE Datathon and the ESCP Energy Trading Challenge, make me well-suited for the analytical and strategic demands of the Associate role at Strategy&.

Outside of my professional life, I am a dedicated trail runner and have a background in boxing. The discipline, resilience, and commitment to excellence nurtured through these pursuits are qualities that I bring into my professional realm.

I am excited at the prospect of leveraging my diverse skill set to drive Strategy&'s strategic initiatives further. I am available for further discussions at +33 664 733 245 or via email at tanguy.mdlg@gmail.com.

Thank you for considering my application. I am keenly interested in contributing to the ongoing success of Strategy&.

Sincerely,

Tanguy Magon de La Giclais
